LKE life cycle management

LKE products are available for many years. Nevertheless, every product life is limited, because technical progress means that more powerful successor products become the state of the art. As a result, the previous products are removed from the product range. LKE announces this as early as possible and supports each customer personally during the changeover to the next generation of products.

Affected products / product group

LKE Modulette® / LKE Modulette® Safe / LKE PRBeh

Base item no. 133-0000

Alternative product(s)

LKE Modulette® 2.0 / LKE Package Container / LKE Roll Container

Base item no. 143-0000

The modulette or mail roll container is being replaced by the LKE packet container.

The product differs from its predecessor essentially in respect of two changed properties:

- the (external) dimensions
~~previously: approx. 1,280 x 1,000 x 1,880 mm~~
NEW: approx. 1,200 x 1,000 x 1,880 mm

While the previous external dimensions were optimised for transport via railway cars, this reduction of about 80 mm is a reaction to changes in the transport conditions: thus the container has been adapted to the so-called industrial format.

- the roller diameter and tread
~~previously: 140 mm Ø~~ NEW: 160 mm Ø

Optimised for wear and adapted for the most ergonomic operation possible, we have increased the roller diameter from 140 mm to 160 mm. The new tread layer is made of a durable PU material.

The data sheet for the successor product is attached.

Variants such as the safe version are also available in our successor product.

ART.-NO.: 14 -000

DIMENSIONS (LxWxH):

- outside: approx. 1,200 x 1,000 x 1,880 mm
- inside: approx. 1,070 x 935 x 1,670 mm

LOADING CAPACITY:

- max. 600 kg

RUNNING GEAR / CASTERS:

- 4 swivel casters with polyurethane mold coating,
- 2 with integrated directional locks,
- Ø 160 mm

FEATURES:

- jacking device
- safety handle and additional grab handles enable safe manoeuvring
- virtual coupling/drawbar system
- foldable base
- straps
- document holder
- volume reduction of 60 % for transport and storage

OPTIONAL:

- securing net
- SAFE-Version
- intermediate shelves
